

Client: **GEM Taylor Constructions**
Property: **22 Junction Road, Merricks North**
Project: **Roof Top, Tunnel Wall, Retaining Wall Waterproofing**

Products Used: Tremco P/L “Tremproof 3300”, “Geosheet drainage 15mm wide, pressure seal flashings.

BTA were engaged to carry out all external waterproofing works for GEM Taylor Constructions.

The works consisted of waterproofing rooftop, tunnel walls & roof & retaining walls totalling 1000m².

The product used was Tremco Pty Ltd “Tremproof 3300” a thick cold applied self adhesive sheet membrane. This also included the footing detailing. Pressure seal flashing was installed to the top terminated edge of our membrane system. “Geosheet 15mm wide” was installed to all areas that required our sheet waterproofing system to assist with drainage from the areas.
